Set-in Corner Triangles

The size of the square piece you'll need to cut in order to create both unfinished set-in triangles and unfinished corner triangles, based on the size of the finished square can be tricky at best.

Terminology - sometimes set-in triangles are called QSTs - quarter square triangles and corner triangles are sometimes called HSTs - half square triangles.

These illustrations and chart of sizes should help.

Length of the finished square's side (inches)	Size of square to cut (inches) for Unfinished Set-In Triangle	Size of square to cut (inches) for Unfinished Corner Triangle
2	4 1/8	2 3/8
3	5 1/2	3
4	7	3 3/4
5	8 3/8	4 1/2
6	9 3/4	5 1/8
7	11 1/4	5 7/8
8	12 5/8	6 5/8
9	14	7 1/4
10	15 1/2	8
11	16 7/8	8 3/4
12	18 1/4	9 3/8
